

EduAirBox

EduAir (Formerly Kwiizi) is the name of the concept offering a better education via digital with or without the internet. Our work focuses on the design of portable and open media libraries in the form of Box giving access to millions of educational content and offering an integrated communication system where users can collaborate within the local network deployed by the Box

Video Courses

Because videos are a way to easily learn new things and better understand concepts, EduAirBox has a video library that provides access to MOOCs and other types of video classes.

COLLABORATIVE

The Box has a collaborative private cloud that allows users to write documents as a team to facilitate exchanges and collaboration

STATISTICS

Stop Educational Boxes with no possibility of feedback on usage statistics. Remotely, you can consult usage data for your boxes and thus measure the social impact of your installation in complete transparency.

OPEN

If you already have web applications in-house, you have the option to install it in the EduAirBox for offline use. We assist you in the installation of your solution coupled to those already present in the EduAirBox

DOCUMENT MANAGER

They have a powerful indexing engine that acts as a document manager that allows you to store your files and search them by keyword. The search is also done inside a document for more precision

RICH

Educational content is pre loaded in the EduAirBox if you do not already have content. More than 7,000,000 articles, 5,000 books in all school subjects, 3,000 video courses and a rich schema library

UPDATE

Remotely updating or sending new documents works perfectly even with very low bandwidth thanks to the EduAirBox compression technology

CUSTOM

You keep the control on all the documents that your Box has so that they are framed according to your needs. The EduAirBox is fully customizable in your mission and your long-term vision and benefit from free update support

COMPACT

ECONOMICAL

COMPLETE

CUSTOMIZABLE

RELIABLE

Start the Digitalization Process

The EduAirBox has a capacity of up to 1 Tera (can hold 3,334,000 pounds) and has wireless (Wi-fi) and cable connectivity to connect all your school computers to the digital library with ease. Its secure coverage range is up to 500 meters (possible to go to 1 kilometer)

LOW POWER CONSUMPTION
Its design and technology reduce heating and consumption of energy at 60W

RESPONSIVE DESIGN
On all devices, users have an interface adapted to the size of the screen their device : computer laptop, tablet and smartphone

WIKIPEDIA
As a bonus, the EduAirBox includes a copy of the Wikipedia online encyclopedia that can be viewed without any internet connection fees throughout your school.

CARACTERISTIQUES

1x i5 5300U vPro CPU
1x TB m.2
1x 10/100/1000 Mbps
1x 8GB DDR3 Memory .
